

MIO-FESTLEGUNG: U-HEFT

FESTLEGUNG GEMÄSS § 355 ABSATZ 1 SGB V

Gemäß § 355 Abs. 1 SGB V trifft die KBV die notwendigen Festlegungen für die Inhalte der elektronischen Patientenakte nach § 341 SGB V, um deren semantische und syntaktische Interoperabilität zu gewährleisten. Die Festlegung erfolgt in einem strukturierten Prozess gemäß der Verfahrensordnung im Benehmen mit Organisationen des Gesundheitswesens.

Der Vorstand der KBV trifft folgende Festlegung:

ARTIKEL 1 - ÜBERGREIFENDE FESTLEGUNGEN ZU FHIR®

Übergreifend für alle FHIR®-Ressourcen gelten die nachfolgenden Festlegungen.

1. FESTLEGUNG DER IN DER EPA ZU SPEICHERNDEN FHIR®-RESSOURCEN

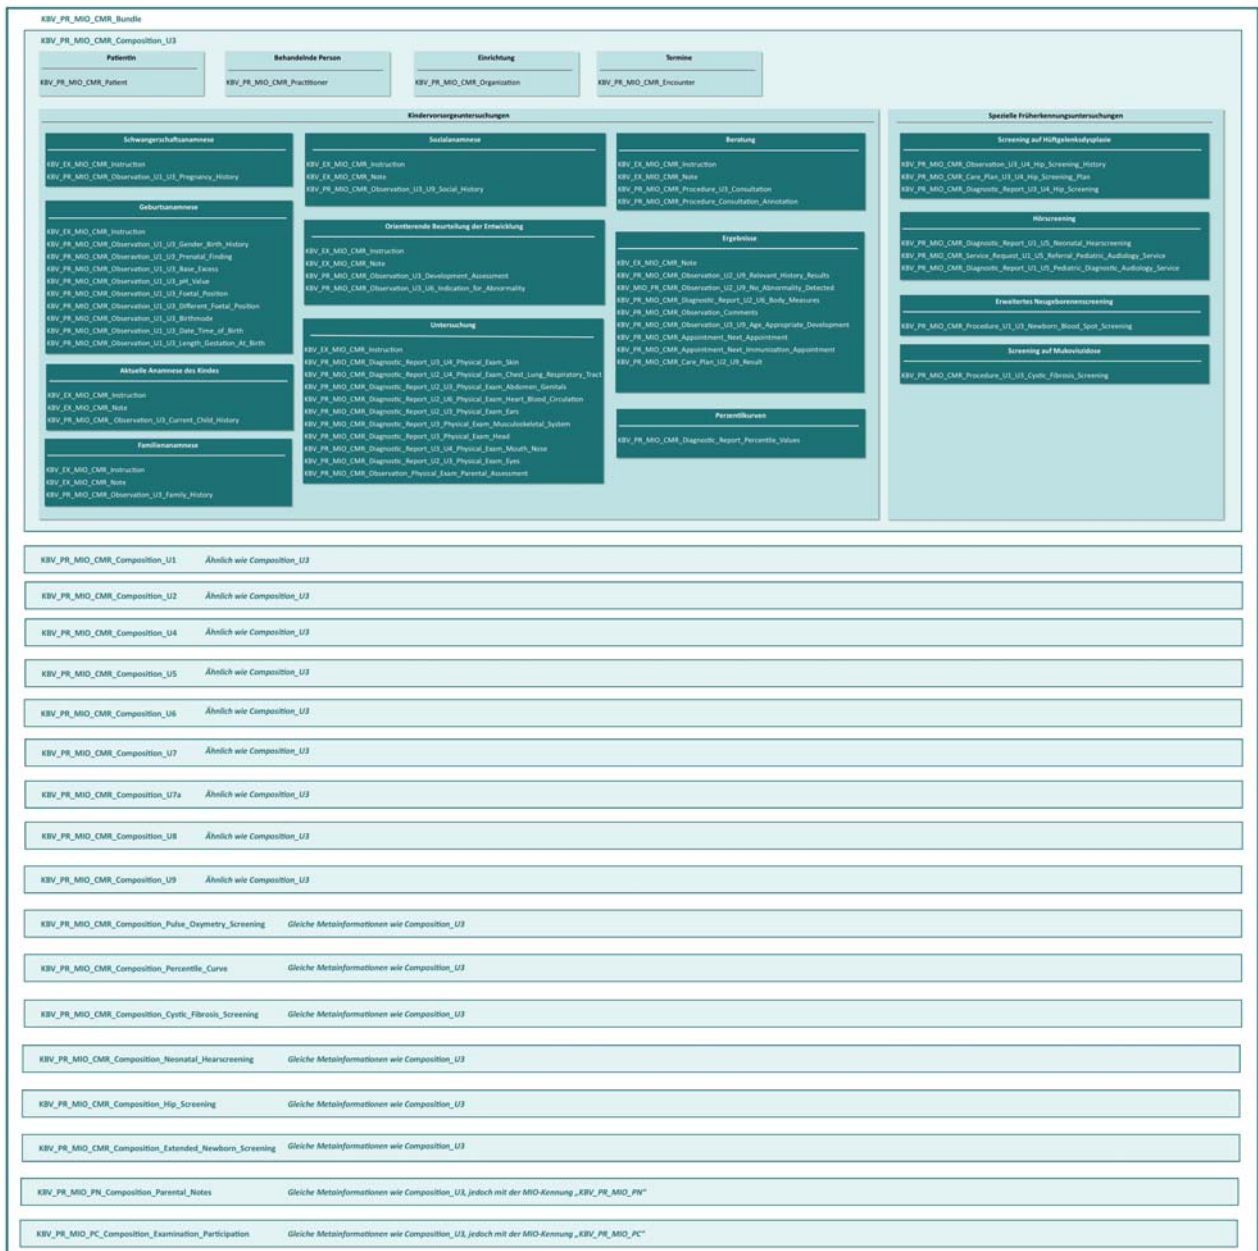

In die ePA (elektronische Patientenakte) dürfen lediglich Bundle als Informationsobjekte für das U-Heft geladen werden. Für das U-Heft gibt es drei verschiedene Bundle:

- KBV_PR_MIO_CMR_Bundle für Einträge ins U-Heft selbst (U-Heft-Untersuchungen). Das Kürzel CMR steht für Child Medical Record.
- KBV_PR_MIO_PC_Bundle für Einträge in die Teilnahmekarte (U-Heft-Teilnahmekarte). Das Kürzel PC steht für Participation Card.
- KBV_PR_MIO_PN_Bundle für Einträge von Elternnotizen (Elternnotiz). Das Kürzel PN steht für Parental Notes.

Für die Szenarien des U-Heftes wie z.B. U2 dokumentieren gibt es jeweils eigene Compositions (in diesem Fall Composition_U2), welche die Struktur der U-Heft Einträge in FHIR® vorgeben. Die Inhalte der Compositions sind in verschiedene Sections aufgeteilt, welche die Abschnitte im U-Heft widerspiegeln. Die Inhalte der Compositions bestehen aus Verweisen auf andere Ressourcen.

Da ein Dokument im juristischen Sinne vollständig und unveränderlich sein muss, wird die Composition mit allen referenzierten Ressourcen zu einem Bundle zusammengefasst.

Dieses festgelegte Zusammenspiel von Bundle, Composition und anderen FHIR®-Profilen stellt die nachfolgende Abbildung grafisch dar. Dabei sind jeweils die zusammenfassenden Profile der Punkte aus dem Informationsmodell bzw. exemplarische Profile dargestellt.

2. FESTLEGUNG DES FORMATS DER FHIR®-RESSOURCEN

Die in der elektronischen Patientenakte (ePA) zu speichernden FHIR®-Ressourcen weisen ein XML-Format gemäß FHIR®-Spezifikation R4 auf.

3. FESTLEGUNG ZUR NUTZUNG VON MUST-SUPPORT

Als Must-Support deklarierte Elemente müssen durch jedes System, welches diese Spezifikation implementiert, unterstützt werden. Das bedeutet, dass das jeweilige System diese interpretieren und verarbeiten können muss. Die Deklaration als Must-Support wird, wie in der Beispielabbildung dargestellt, durch ein rotes S gekennzeichnet.

Beispielabbildung

ARTIKEL 2 - FESTLEGUNG DER FHIR®-RESSOURCEN

<fixedString value="Liebe Eltern, herzlichen Glückwunsch zur Geburt Ihres Babys! Gerade in den ersten Lebensjahren macht Ihr Kind sehr viele Entwicklungsschritte. Um eventuell vorliegende Erkrankungen und Entwicklungsverzögerungen frühzeitig erkennen und entsprechend handeln zu können, gibt es regelmäßige Untersuchungen. Diese sind ein wichtiger Teil der Gesundheitsvorsorge für Ihr Kind. Die Kosten werden von der gesetzlichen Krankenversicherung übernommen. Innerhalb der ersten sechs Lebensjahre untersucht die Ärztin oder der Arzt, ob sich Ihr Kind gesund und altersgemäß entwickelt. Die Ergebnisse jeder Untersuchung werden Ihnen erläutert. Darüber hinaus werden Sie über Schutzimpfungen informiert, die zugleich mit den Untersuchungen erfolgen können. Sie haben bei sämtlichen Untersuchungen die Gelegenheit, die Entwicklung Ihres Kindes mit der Ärztin oder dem Arzt zu besprechen und Fragen zu stellen, etwa zu Themen wie Ernährung oder Unfallvermeidung. Zudem erhalten Sie im Rahmen der einzelnen Untersuchungen von der Ärztin oder dem Arzt Informationen zu regionalen Unterstützungsangeboten (wie z. B. Eltern-Kind-Angebote, Frühe Hilfen, Familienhebammen, -paten, öffentlicher Gesundheitsdienst). Für alle Untersuchungen sind bestimmte Zeiträume vorgegeben. Dass Sie diese kennen und einhalten, ist besonders wichtig, da manche Liebe Eltern, herzlichen Glückwunsch zur Geburt Ihres Babys! Bitte beachten Sie, dass es sich bei dem Gelben Heft um eine vertrauliche Information handelt. Keine Institution (z. B. Kita, Schule, Jugendamt) darf eine Einsichtnahme verlangen. Sie entscheiden, wem Sie den Einblick gewähren. Die herausnehmbare Teilnahmekarte ist als Beleg für die Wahrnehmung der Untersuchungen ausreichend. Erkrankungen nur in einer bestimmten Altersspanne rechtzeitig erkannt und behandelt werden können (z. B. Stoffwechselstörungen oder Fehlstellungen der Hüfte). Auch bei Frühgeborenen, also Kindern, die vor der 37+0 Schwangerschaftswoche geboren werden, sollen die Untersuchungszeiträume dringend eingehalten werden. In solchen Fällen wird der frühe Geburtstermin bei der Interpretation der Ergebnisse berücksichtigt. Bitte nutzen Sie das Angebot der Untersuchungen! Sie geben sich und Ihrem Kind die Chance, dass gesundheitliche Probleme oder Auffälligkeiten rechtzeitig erkannt und behandelt werden können. Wir wünschen Ihrem Kind und Ihnen alles Gute! Gemeinsamer Bundesausschuss, Berlin* | Der Gemeinsame Bundesausschuss (G-BA) wird gebildet von der Kassenärztlichen und der Kassenzahnärztlichen Bundesvereinigung, der Deutschen Krankenhausgesellschaft e.V. und dem Spitzenverband der gesetzlichen Krankenversicherung. Der G-BA legt in Richtlinien fest, welche Leistungen der medizinischen Versorgung von der gesetzlichen Krankenversicherung übernommen werden. Das Gelbe Heft ist eine Anlage der Kinder-Richtlinie des G-BA. Weitere Informationen finden Sie auf den Internetseiten des G-BA unter www.g-ba.de." />

146       <fixedString value="U1 Elterninformation zur Neugeborenen-
Erstuntersuchung Unmittelbar nach der Geburt findet die erste Untersuchung
Ihres Babys statt. Die Ärztin oder der Arzt oder die Hebamme oder der
Entbindungspfleger vergewissern sich, dass Ihr Baby die Geburt gut
überstanden hat. Es geht bei der U1 vor allem darum, sofort
behandlungsbedürftige Zustände und äußerliche Fehlbildungen zu erkennen. So
können notwendige Sofortmaßnahmen eingeleitet und Komplikationen vermieden
werden. Das wird untersucht: • Mit dem sogenannten Apgar-Wert werden die
Hautfarbe des Babys, der Herzschlag, die Reflexe, die Muskelspannung und
die Atmung geprüft. Dieser Wert wird nach fünf und nochmals nach zehn
Minuten ermittelt. • Um sicher zu sein, dass Ihr Neugeborenes während der
Geburt ausreichend mit Sauerstoff versorgt worden ist, wird der Nabelschnur
Blut entnommen und dessen pH-Wert (Säuregrad) bestimmt. • Es wird nach
äußerlich erkennbaren Fehlbildungen geschaut. Ihr Baby wird gemessen und
gewogen und es erhält nach Rücksprache mit Ihnen Vitamin K, um inneren
Blutungen vorzubeugen. Zur Ernährung Ihres Kindes (Stillen oder andere
Ernährungsformen) werden Sie fachkundig beraten und können während der
gesamten Stillzeit und bei Ernährungsproblemen auf Hilfe zurückgreifen. In
den kommenden drei Tagen werden Ihnen für Ihr Baby weitere wichtige
Untersuchungen empfohlen. Diese sollen eine rechtzeitige Behandlung der
jeweiligen Erkrankungen ermöglichen. Der Test auf kritische angeborene
Herzfehler sollte nach der 24. bis zur 48. Lebensstunde Ihres Babys
durchgeführt werden. Die Tests auf angeborene Stoffwechselstörungen und
Mukoviszidose aus einigen Tropfen Blut Ihres Babys sollten zwischen der 36.
und 72. Lebensstunde erfolgen. Der Hörtest für Neugeborene sollte bis zur
72. Lebensstunde vorgenommen werden. Zu diesen Untersuchungen erhalten Sie
jeweils ein ausführliches Informationsblatt. Die nächste Untersuchung soll
vom 3. bis zum 10. Lebenstag (U2) vorgenommen werden." />

    <fixedString value="U2 Elterninformation zur Untersuchung vom 3. bis
zum 10. Lebensstag Ihr Baby ist jetzt einige Tage alt. Wenn Sie in der
Klinik sind, wird die zweite Untersuchung, die U2, dort stattfinden. Wenn
Sie zu Hause sind, vereinbaren Sie so früh wie möglich einen
Untersuchungstermin bei der Ärztin oder dem Arzt, die oder der Ihr Baby
betreuen soll. Die U2 soll drei bis spätestens zehn Tage nach der Geburt
stattfinden. Falls die Tests auf kritische angeborene Herzfehler,
angeborene Stoffwechselstörungen und/oder Mukoviszidose sowie der
Neugeborenen-Hörtest noch nicht durchgeführt wurden, sollten sie umgehend
erfolgen, da es für einige Erkrankungen wichtig ist, dass die Diagnose
schnell gestellt werden kann. Durch eine eingehende körperliche
Untersuchung Ihres Babys sollen bei der U2 angeborene Erkrankungen und
Fehlbildungen (z. B. Fehlbildungen des Herzens) erkannt und
lebensbedrohliche Komplikationen vermieden werden. Hierzu gehört auch das
Erkennen einer behandlungsbedürftigen Gelbsucht. Bei dieser und bei allen
weiteren Untersuchungen wird Ihr Baby gemessen und gewogen. Es wird
besonders geachtet auf: • die Haut • die Sinnesorgane • die Brust- und
Bauchorgane • die Geschlechtsorgane • den Kopf (Mund, Nase, Augen, Ohren) •
das Skelettsystem mit Muskeln und Nerven. Die Ärztin oder der Arzt
bespricht mit Ihnen, was für die gesunde Entwicklung Ihres Babys wichtig
ist. Sie erhalten Informationen zu regionalen Unterstützungsangeboten (z.
B. Eltern-Kind-Hilfen, Frühe Hilfen). Bei dieser Untersuchung erhält Ihr
Baby nochmals Vitamin K, um Blutungen vorzubeugen. Außerdem werden Sie über
Vitamin D zur Vorbeugung der Knochenerkrankung Rachitis und über Fluorid
beraten, das für die spätere Zahnhärtung wichtig ist. Gegebenenfalls werden
diese Ihrem Baby verschrieben. Außerdem werden Sie zu den Themen Stillen
und Ernährung beraten sowie über Maßnahmen, die das Risiko eines
plötzlichen Kindstodes vermindern." />

    <fixedString value="U3 Elterninformation zur Untersuchung von der 4.
bis zur 5. Lebenswoche Ihr Baby ist jetzt etwa einen Monat alt. Die meisten
Babys können von der dritten Woche an den Kopf zu Geräuschquellen
hinwenden. Sie schauen lieber farbige als graue Flächen an und haben einen
ausgeprägten Saug- und Greifreflex. Ein wichtiges Ziel der U3 und aller
weiteren Untersuchungen ist es, Entwicklungsauffälligkeiten möglichst
frühzeitig zu erkennen. Bei der U3 achtet die Ärztin oder der Arzt
beispielsweise darauf, ob Ihr Baby schon in Bauchlage den Kopf halten kann,
die Hände spontan öffnet oder aufmerksam in nahe Gesichter schaut. Neben
einer gründlichen körperlichen Untersuchung werden zusätzlich mit
Ultraschall die Hüftgelenke Ihres Babys überprüft, um eventuelle
Fehlstellungen rechtzeitig behandeln zu können. Die Ultraschalluntersuchung
der Hüftgelenke sollten Sie nutzen, da Sie Ihrem Baby dadurch
schwerwiegende, lebenslange Beschwerden ersparen können. Wie bei der U1 und
U2 wird die Ärztin oder der Arzt nochmals darauf achten, ob Ihr Baby eine
behandlungsbedürftige Gelbsucht hat, die zum Beispiel ein Hinweis auf einen
Verschluss der Gallengänge sein kann. Sie werden gefragt, ob es
Auffälligkeiten beim Schlafen, Trinken, bei der Verdauung oder im sonstigen
Verhalten Ihres Babys gibt. Zur Vorbeugung gegen die Knochenerkrankung
Rachitis wird Vitamin D sowie Fluorid für die spätere Zahnhärtung
empfohlen. Sie werden erneut zum Thema Stillen und Ernährung beraten sowie
über Maßnahmen, die das Risiko eines plötzlichen Kindstodes mindern. Zudem
geht es allgemein um Unfallverhütung und um Gefahren für Ihr Baby durch
Abhängigkeit und Sucht in der Familie. Falls die Tests auf angeborene
Stoffwechselstörungen und/oder Mukoviszidose sowie der Neugeborenen-Hörtest
noch nicht stattgefunden haben, sollten sie umgehend erfolgen, da es für
einige Erkrankungen wichtig ist, dass die Diagnose schnell gestellt werden
kann." />

    <fixedString value="U4 Elterninformation zur Untersuchung vom 3. bis
zum 4. Lebensmonat Die meisten Babys werden in diesem Alter immer mobiler
und aktiver. Sie beginnen, nach Dingen zu greifen und zu lächeln. Sie
reagieren auf ihre Bezugsperson. Außerdem machen sie sich durch bestimmte
Laute bemerkbar. Die Ärztin oder der Arzt achtet vor allem darauf, ob sich
Ihr Baby körperlich und geistig altersgerecht entwickelt. Unter anderem
wird auch beobachtet, wie sich Ihr Baby bewegt. Die Ärztin oder der Arzt
prüft, ob Ihr Baby hören und sehen kann. Außerdem interessiert es Ihre
Ärztin oder Ihren Arzt, wie Sie und Ihr Baby miteinander im Kontakt sind.
Es wird wieder eine körperliche Untersuchung durchgeführt und dabei wird
auch kontrolliert, ob die Knochenlücke am Kopf (Fontanelle) ausreichend
groß ist, damit der Schädel weiterhin problemlos wachsen kann. Zur U4
werden Wiederholungsimpfungen angeboten. Spätestens jetzt erfolgen die
ersten Impfungen. Außerdem spricht die Ärztin oder der Arzt mit Ihnen über
Themen wie die Ernährung und Verdauung Ihres Babys, Maßnahmen zur
Vermeidung des plötzlichen Kindstodes, Unfallverhütung und wie Sie
reagieren sollten, wenn Ihr Baby besonders viel schreit und nicht schlafen
kann. Weitere Themen sind die Förderung der Sprachentwicklung durch
häufiges Sprechen und Singen mit dem Baby sowie die Rachitisprophylaxe
mittels Vitamin D und die Kariesprophylaxe mittels Fluorid. Sie erhalten
Informationen zu regionalen Unterstützungsangeboten (z. B. Eltern-Kind-
Hilfen, Frühe Hilfen). Falls der Neugeborenen-Hörtest noch nicht
stattgefunden hat, sollte er umgehend erfolgen." />

118 <sliceName value="valueString" />
    <fixedString value="U5 Elterninformation zur Untersuchung vom 6. bis
    zum 7. Lebensmonat Ihr Baby entwickelt sich weiter. Die meisten Babys
    können ihren Oberkörper auf den gestützten Armen anheben. Sie lachen, wenn
    sie geneckt werden und sie versuchen vielleicht schon, sich mit
    mehrsilbigen Lautketten wie „dei-dei-dei“ mitzuteilen. Bei einigen Babys
    setzt jetzt das „Fremdeln“ ein, Ihr Baby unterscheidet also in seinem
    Verhalten zwischen bekannten und unbekanntem Personen. Typisch für dieses
    Alter ist auch, dass Gegenstände in die Hand genommen und in den Mund
    gesteckt werden. Die Ärztin oder der Arzt achtet bei der U5 insbesondere
    darauf, ob es bei Ihrem Baby Hinweise auf Entwicklungsverzögerungen oder
    -risiken gibt. Ihr Baby wird körperlich untersucht. Um Hinweise auf
    Sehstörungen zu bekommen, werden zur Untersuchung der Augen bestimmte Tests
    durchgeführt. Die Ärztin oder der Arzt beobachtet, wie beweglich Ihr Baby
    ist und wie es seinen Körper beherrscht. Außerdem interessiert sich Ihre
    Ärztin oder Ihr Arzt für den Kontakt zwischen Ihnen und Ihrem Baby. Ihre
    Ärztin oder Ihr Arzt berät Sie zu den laut Impfkalender empfohlenen
    Schutzimpfungen. Außerdem spricht die Ärztin oder der Arzt mit Ihnen über
    Themen wie die Ernährung und Verdauung Ihres Babys sowie über Maßnahmen zur
    Vermeidung des plötzlichen Kindstodes. Sehr wichtig ist das Gespräch über
    Unfallverhütung, Ihr Verhalten, wenn das Baby schreit und die Vermeidung
    von Schlafstörungen. Die Förderung der Sprachentwicklung ist ein weiteres
    Thema. Weiterhin werden die Rachitisprophylaxe mittels Vitamin D und die
    Kariesprophylaxe mittels Fluorid besprochen. Sie erhalten von der Ärztin
    oder dem Arzt Rat zur kindlichen Mundhygiene. Zur Abklärung von
    Auffälligkeiten an den Zähnen oder der Mundschleimhaut bei Ihrem Baby
    werden Sie zur Zahnärztin oder zum Zahnarzt verwiesen. Sie erhalten
    Informationen zu regionalen Unterstützungsangeboten (z. B. Eltern-Kind-
    Hilfen, Frühen Hilfen)." />

117    <fixedString value="U6 Elterninformation zur Untersuchung vom 10. bis
zum 12. Lebensmonat Ihr Kind ist jetzt fast ein Jahr alt. Es kann
wahrscheinlich schon robben oder krabbeln und sich an Möbeln in den Stand
hochziehen. Mit Unterstützung geht es möglicherweise sogar schon ein paar
Schritte. Ihr Kind wird fingerfertiger, so dass es mit etwas Hilfe auch
schon aus einem Becher trinken kann. Die meisten Kinder ahmen in diesem
Alter Laute nach und können Doppelsilben wie „da-da“ bilden. Wenn Sie Ihr
Kind dazu auffordern, reicht es Ihnen vielleicht schon einen Gegenstand.
Die Ärztin oder der Arzt achtet bei der U6 wieder besonders auf
Entwicklungsauffälligkeiten. Ihr Kind wird körperlich untersucht. Zum
Erkennen von Sehstörungen werden Untersuchungen der Augen durchgeführt. Die
Ärztin oder der Arzt schaut, wie beweglich Ihr Kind ist und wie es seinen
Körper beherrscht. Außerdem interessiert sich Ihre Ärztin oder Ihr Arzt für
den Kontakt zwischen Ihnen und Ihrem Kind. Ihre Ärztin oder Ihr Arzt berät
Sie zu den laut Impfkalender empfohlenen Schutzimpfungen. Die Ärztin oder
der Arzt bespricht mit Ihnen Themen wie die Ernährung Ihres Kindes und
Maßnahmen zur Unfallverhütung. Die Förderung der Sprachentwicklung sind
weitere Themen, ebenso die Rachitisprophylaxe mittels Vitamin D und
Kariesprophylaxe mittels Fluorid. Sie erhalten von der Ärztin oder dem Arzt
Hinweise zur kindlichen Mundhygiene. Zur Abklärung von Auffälligkeiten an
den Zähnen oder der Mundschleimhaut bei Ihrem Kind werden Sie zur
Zahnärztin oder zum Zahnarzt verwiesen. Sie erhalten Informationen zu
regionalen Unterstützungsangeboten (z. B. Eltern-Kind-Hilfen, Frühe
Hilfen)." />

117 <fixedString value="U7 Elterninformation zur Untersuchung vom 21. bis
zum 24. Lebensmonat Ihr Kind ist jetzt fast zwei Jahre alt. Es kann nun
wahrscheinlich schon über längere Zeit frei und sicher laufen und auch
schon Treppenstufen hinuntergehen. Bei den meisten Kindern wächst der
Wortschatz schnell. Sie sagen gerne „Nein“ und probieren aus, was sie mit
ihrem Verhalten bewirken. Die letzte Untersuchung liegt etwa ein Jahr
zurück. Die Ärztin oder der Arzt achtet bei der U7 wieder besonders auf
Entwicklungsauffälligkeiten. Ihr Kind wird körperlich untersucht. Zum
Erkennen von Sehstörungen werden Untersuchungen der Augen durchgeführt. Die
Ärztin oder der Arzt prüft, ob Ihr Kind einfache Wörter und Sätze versteht.
Sie werden gefragt, wie sich Ihr Kind zum Beispiel beim Spielen, in der
Familie oder in einer Gruppe von Kindern verhält. Außerdem interessiert
sich Ihre Ärztin oder Ihr Arzt für den Kontakt zwischen Ihnen und Ihrem
Kind. Ihre Ärztin oder Ihr Arzt berät Sie zu den laut Impfkalender
empfohlenen Schutzimpfungen. Außerdem spricht die Ärztin oder der Arzt mit
Ihnen über Themen wie die Ernährung Ihres Kindes, Maßnahmen zur
Unfallverhütung, die Förderung der Sprachentwicklung und die
Kariesprophylaxe mittels Fluorid. Sie erhalten von der Ärztin oder dem Arzt
Hinweise zur kindlichen Mundhygiene. Zur Abklärung von Auffälligkeiten beim
Kieferwachstum, an den Zähnen oder der Mundschleimhaut bei Ihrem Kind
werden Sie zur Zahnärztin oder zum Zahnarzt verwiesen." />

117     <fixedString value="U7a Elterninformation zur Untersuchung vom 34.
bis zum 36. Lebensmonat Ihr Kind ist jetzt etwa drei Jahre alt. Die meisten
Kinder sprechen von sich in der Ich-Form und möchten mit kleinen
Handreichungen im Haushalt helfen. Sie haben Freude daran, mit anderen
Kindern zu spielen und dabei in andere Rollen zu schlüpfen. Ihr Kind hat
vielleicht einen großen Bewegungsdrang, kann schon Stufen im
„Erwachsenenschritt“ steigen und von unteren Treppenstufen herabspringen.
Die Ärztin oder der Arzt achtet bei der U7a wieder besonders auf
Entwicklungsauffälligkeiten. Ihr Kind wird körperlich untersucht. Zum
Erkennen von Sehstörungen werden Sehtests durchgeführt. Außerdem sieht sich
die Ärztin oder der Arzt bei der U7a die Beschaffenheit der Zähne und die
Entwicklung des Kiefers an. Eine besondere Aufmerksamkeit gilt der
sprachlichen Entwicklung Ihres Kindes. Außerdem interessiert sich Ihre
Ärztin oder Ihr Arzt für den Kontakt zwischen Ihnen und Ihrem Kind. Ihre
Ärztin oder Ihr Arzt berät Sie zu den laut Impfkalender empfohlenen
Schutzimpfungen. Die Ärztin oder der Arzt bespricht mit Ihnen Themen wie
die Ernährung und Bewegung Ihres Kindes sowie Maßnahmen zur
Unfallverhütung. Die Förderung der Sprachentwicklung sowie die Rolle von
Medien (z. B. TV, Spielekonsolen, Internet und Ähnlichem) im Alltag des
Kindes sind weitere Themen. Ihre Ärztin oder Ihr Arzt verweist Sie zur
zahnärztlichen Früherkennungsuntersuchung." />

    <fixedString value="U8 Elterninformation zur Untersuchung vom 46. bis
zum 48. Lebensmonat Ihr Kind ist jetzt fast vier Jahre alt. Die meisten
Kinder können sich in diesem Alter schon selbst an- und ausziehen. Ihre
Sprache ist schon so weit entwickelt, dass sie vielleicht kleine
Geschichten erzählen können und viele Fragen nach dem Warum, Wie, Wo oder
Wann stellen. Die Ärztin oder der Arzt achtet bei der U8 wieder besonders
auf Entwicklungsauffälligkeiten. Ihr Kind wird körperlich untersucht. Zum
Erkennen von Sehstörungen werden Sehtests durchgeführt. Das Hörvermögen
Ihres Kindes wird ebenfalls geprüft. Die Ärztin oder der Arzt untersucht
die Beschaffenheit der Zähne und die Entwicklung des Kiefers. Während der
Untersuchung testet die Ärztin oder der Arzt, wie beweglich und geschickt
Ihr Kind ist, ob es sich alleine beschäftigen kann und wie gut es spricht.
Sie werden gefragt, wie sich Ihr Kind beim Spielen, in der Familie oder in
einer Gruppe von Kindern verhält. Außerdem interessiert sich Ihre Ärztin
oder Ihr Arzt für den Kontakt zwischen Ihnen und Ihrem Kind. Ihre Ärztin
oder Ihr Arzt berät Sie zu den laut Impfkalender empfohlenen
Schutzimpfungen. Außerdem spricht die Ärztin oder der Arzt mit Ihnen über
Themen wie die Ernährung und Bewegung Ihres Kindes, Maßnahmen zur
Unfallverhütung, die Förderung der Sprachentwicklung und den
verantwortungsbewussten Gebrauch von Medien (z. B. TV, Spielekonsolen,
Internet und Ähnlichem) im Alltag Ihres Kindes. Ihre Ärztin oder Ihr Arzt
verweist Sie zur zahnärztlichen Früherkennungsuntersuchung." />

115     <fixedString value="U9 Elterninformation zur Untersuchung vom 60. bis
zum 64. Lebensmonat Ihr Kind ist jetzt etwa fünf Jahre alt. Viele Kinder
haben in diesem Alter einen großen Bewegungsdrang, klettern gern und
stellen viele Fragen. In der Regel entwickeln die Kinder in Rollenspielen
mit anderen viel Fantasie und haben Freude am Malen mit Buntstiften oder am
Schneiden mit einer Schere. Sollte Ihr Kind noch nicht alle Laute
fehlerfrei aussprechen, bitten Sie Ihre Ärztin oder Ihren Arzt, darauf
besonders zu achten und Sie dazu zu beraten. Die Ärztin oder der Arzt
achtet bei der U9 wieder besonders auf Entwicklungsauffälligkeiten. Ihr
Kind wird körperlich untersucht. Zum Erkennen von Sehstörungen werden
wieder Sehtests durchgeführt. Die Ärztin oder der Arzt testet, wie
beweglich und wie geschickt Ihr Kind ist und wie gut es spricht. Außerdem
möchte die Ärztin oder der Arzt wissen, woran Ihr Kind Interesse und Freude
hat oder wovor es sich möglicherweise ängstigt. Ihr Kind kommt bald in die
Schule. Damit die Ärztin oder der Arzt Sie gegebenenfalls rechtzeitig
unterstützen kann, sind diese Informationen wichtig. Außerdem interessiert
sich Ihre Ärztin oder Ihr Arzt für den Kontakt zwischen Ihnen und Ihrem
Kind. Ihre Ärztin oder Ihr Arzt berät Sie zu den laut Impfkalender
empfohlenen Schutzimpfungen. Zudem spricht die Ärztin oder der Arzt mit
Ihnen über Themen wie die Ernährung und Bewegung Ihres Kindes, Maßnahmen
zur Unfallverhütung, die Förderung der Sprachentwicklung und den
verantwortungsbewussten Gebrauch von Medien (z. B. TV, Spielekonsolen,
Internet und Ähnlichem) im Alltag Ihres Kindes. Sie werden nochmals auf
eine Kariesprophylaxe mittels Fluorid aufmerksam gemacht. Ihre Ärztin oder
Ihr Arzt verweist Sie zur zahnärztlichen Früherkennungsuntersuchung." />
