ARTIKEL 3 - FESTLEGUNGEN ZUR SIGNATUR

Wenn eine Signatur des medizinischen Informationsobjektes U-Heft notwendig ist, erfolgt dies mittels der CADES-Enveloping Signaturfunktionalität des Konnektors der Telematikinfrastruktur. Die in diesem Zusammenhang vom Primärsystem (= eingesetztes IT-System) als Data To Be Signed Representation (DTBSR) zusammenzustellenden Daten bilden eine FHIR-XML-Datei und entsprechen dabei einer Bundle-Ressource gemäß dem Abschnitt In der ePA zu speichernde FHIR®-Ressourcen.

Für Einträge in folgende Bundles können Signaturen erzeugt werden:

- KBV_PR_MIO_CMV_Bundle für Einträge ins U-Heft selbst (U-Heft-Untersuchungen)
- KBV_PR_MIO_PC_Bundle für Einträge in die Teilnahmekarte (U-Heft-Teilnahmekarte)

Bei der Signatur handelt es sich um eine Qualifizierte elektronische Signatur (QES) mit einem elektronischen Heilberufsausweis.

Einträge von Elternnotizen werden nicht mit einer Signatur versehen (KBV_PR_MIO_PN_Bundle).

ARTIKEL 4 - INKRAFTTRETEN UND GELTUNG

Diese Festlegung tritt am Tag nach ihrer Veröffentlichung in Kraft. Sie gilt ab dem 01.01.2022.
